# Mace Akkari

## Software Engineer

**London | 07867-996688 | developer.mace@gmail.com | linkedin.com/in/maceakkari**

## SUMMARY

Software Engineer with four years of commercial experience building web applications using React, Next.js, TypeScript and Node.js. Experienced in delivering production features, implementing automated testing and developing cross-platform mobile applications using Flutter. I enjoy working with teams, solving problems and building software that is reliable, maintainable and easy to use.

## CAREER EXPERIENCE

**BioAge – Healthcare Startup** **Full-Stack Software Engineer** (Sep 2025 - Present)

Next.js, TypeScript, Flutter, Tailwind CSS, REST APIs

- Develop the web platform using Next.js, TypeScript and REST APIs, collaborating with UX/UI designers and a four-person engineering team.
- Build and test the Flutter mobile application, resolving cross-platform issues and preparing it for release on the Apple App Store and Google Play Store.
- Work closely with the CEO and CTO on technical decisions, reviewing and approving pull requests and maintaining code quality.

**UPSTREAM – Streetwear Rental App** **Full-Stack Developer** (Oct 2024 - Jul 2025)
**Consultant** (Jan 2023 - Aug 2023)

Next.js, TypeScript, REST APIs, Tailwind CSS, Cypress

- Developed and delivered production features using Next.js and TypeScript, translating product requirements into scalable web functionality.
- Played a key role in transitioning the product from a mobile app to a web platform.
- Improved engineering workflows by facilitating retrospectives and supporting cross-team efforts to improve application performance.

**CLU – Recruitment Platform** **Full-Stack Developer** (Jul 2023 - Oct 2024)

JavaScript, CSS, PHP, PostgreSQL, REST APIs

- Implemented new platform features within a custom JavaScript/PHP framework, enhancing system functionality and user experience.
- Integrated Google Tag Manager and Google Analytics tracking to enable data-driven decisions.
- Diagnosed and resolved production issues, improving platform stability and development workflow efficiency.

**ReLyfe – Medical Startup** **Developer** (Jul 2021 - Sep 2022)

React, TypeScript, Node.js, CSS, Cypress

- Developed scalable mobile-first features using React and TypeScript in a fast-paced startup environment.
- Refactored legacy code to improve maintainability and application performance.
- Introduced Cypress testing and built the initial test suite, improving application reliability and reducing regressions.

## TECHNICAL PROFICIENCIES

**Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS

**Backend:** Node.js, Express.js, REST APIs

**Mobile:** Flutter, Dart

**Databases:** PostgreSQL, MongoDB, Firebase

**Testing:** Cypress, Jest

**Analytics:** Google Tag Manager, Google Analytics

**Tools:** Git, GitHub, GitLab, Jira, Sanity

**Practices:** Agile, Scrum, Test-Driven Development (TDD), Mobile-First Development

## PORTFOLIO

For more projects, please visit: **https://mace-portfolio.vercel.app**

**Track My Progress -** A gym app that allows users to track their training sessions like a journal.

**Buy The Hour -** A finance app built with Next.js, Firebase and shadcn/ui.

**Company Dashboard -** A staff dashboard for managing employees, IT requests and tasks.

## EDUCATION

**Web Development Bootcamp | Makers Academy**
**Higher National Diploma in Computing | Kingston University**
